New York, NY | +1 (929) 225-9158 | [linkedin.com/in/jhon-milo-nunez](https://www.linkedin.com/in/jhon-milo-nunez) | github.com/jhonmilonunez | jhonmilonunez.vercel.app

PROFESSIONAL SUMMARY

Java application developer with hands-on experience building and deploying full-stack web applications using JakartaEE, JAX-RS REST APIs, and PostgreSQL with JDBC persistence. Designed and delivered a containerized, production-deployed application featuring REST endpoint validation, an automated CI/CD pipeline, and an ADA Section 508-compliant frontend. Seeking to apply Java application development skills in a team-oriented environment focused on quality, compliance, and reliable application delivery.

EDUCATION

Binghamton University, State University of New York, School of Computing

May 2026

Bachelor of Science in Computer Science, Cybersecurity Track

Relevant Coursework: Java Design Patterns, Object-Oriented Programming, Computer Networks, Science of Cybersecurity, Mobile Systems Security

PROJECTS

menYOU | *Java 17, Jersey (JAX-RS), PostgreSQL, React 18, Docker, Render*

- Architected and solo-developed a full-stack restaurant-first calorie tracking web app, exposing a Jersey (JAX-RS) REST API on embedded Tomcat with HikariCP connection pooling, packaged as an executable fat JAR via Maven Shade.
- Migrated the persistence layer from embedded H2 to managed PostgreSQL with an environment-aware connection layer (production via DATABASE_URL, H2 fallback for local dev), a portable JDBC schema/seed executor, and idempotent seeding with sequence resets.
- Containerized the application with Docker and deployed to Render, serving a React 18 + Vite single-page frontend from the Java app's static resources with anonymous cookie-based sessions.
- Engineered idempotent data upserts backed by a database uniqueness constraint, ensuring re-imports refresh records instead of duplicating across 1,401 menu items from 7 national chains.
- Built React UI features including collapsible menu categories and multi-criteria sorting/filtering (most recent, calorie range, best protein-to-calorie ratio).
- Maintained a 55-test JUnit 5 suite covering the data layer and REST endpoints to enforce reliability across persistence and API workflows.

jhonmilonunez.vercel.app | *React.js, JavaScript, HTML, CSS, Riot Games API*

- Integrated the Riot Games API to fetch and display live Teamfight Tactics rank data, demonstrating consumption of a third-party REST API with dynamic frontend rendering in React.js

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL, HTML, CSS

Frameworks/Technologies: JakartaEE, JAX-RS, JDBC, React.js, REST APIs, PostgreSQL, HikariCP

Tools: Git, GitHub Actions, Maven, Postman, Docker, Render, Vite, Visual Studio Code

Methodologies: CI/CD, REST API design, OOP design patterns

WORK EXPERIENCE

Binghamton University Residential Life, Community Assistant | *Vestal, NY*

August 2023 – May 2026

- Maintained structured case documentation for 50+ residents, building record-keeping workflows that enabled pattern identification across conduct incidents and traceable follow-through on escalated cases

LEADERSHIP

Philippine American League, President | *Vestal, NY*

August 2025 - May 2026

- Coordinated initiatives across a 36-person executive board and university administration stakeholders, establishing accountability frameworks that ensured on-time delivery for a 300+ member organization across 7 divisions
